TECHNICAL SKILLS

LANGUAGES

JavaScript (ES2022+)

TypeScript

Python

Go

SQL · HTML / CSS

FRONTEND

Next.js · React

Vue.js · Nuxt

Tailwind CSS

Framer Motion · HeroUI

STATE MANAGEMENT

Redux Toolkit + Saga

Zustand · Pinia

React Context

BACKEND

Node.js · Express.js

Bun.js

GraphQL · REST APIs

Socket.IO · Kafka

DATABASES & ORM

PostgreSQL · MySQL

MongoDB · Supabase

TypeORM · Mongoose

CMS

Strapi · Sanity

CLOUD & DEVOPS

AWS (S3, EC2, Lambda)

Amplify · CodeDeploy

Docker · Nginx

PM2 · Certbot

Bitbucket CI/CD

Cloudflare Workers

INTEGRATIONS

OpenAI GPT-4 · Stripe

PROFESSIONAL SUMMARY

Full Stack Web Developer with 3+ years of experience designing and delivering scalable microservices architectures and production web applications for GCC-region clients. Deep expertise in Next.js, Express.js, TypeScript, PostgreSQL, and MySQL. Proven ability to own projects end-to-end — system design, REST/GraphQL APIs, cloud infrastructure (AWS), CI/CD pipelines, and frontend UX. Experienced with Docker, Kafka, and OpenAI integrations.

WORK EXPERIENCE

Silverfern Digital

March 2023 – Present

Full-Stack Web Developer · Panchkula, Haryana, India

- Architected and delivered **microservices-based systems** for GCC-region clients using Express.js, TypeORM, PostgreSQL, and Kafka for event-driven communication.
- Built **Next.js production applications** with Strapi CMS, multi-language i18n routing, and server-side rendering powering 25+ dynamic pages.
- Leveraged **AWS** (S3, EC2, Lambda, Amplify, CodeDeploy, IAM, SSM) for scalable cloud infrastructure.
- Managed complete **DevOps lifecycle**: Bitbucket CI/CD pipelines, Nginx reverse proxy, SSL via Certbot, and PM2-supervised production deployments.
- Implemented **GraphQL APIs** with custom schemas, mutations, and resolvers; used Docker for containerised environments.
- Built responsive **Vue.js** frontends with Pinia state management; contributed to e-learning platform via Strapi CMS.
- Performed **code reviews and mentoring**, enforcing coding standards and best practices across the engineering team.

Shivila Technologies

December 2021 – April 2022

React Developer · Kolkata, India

- Delivered UI components across **three client projects** using React.js and Material-UI.
- Implemented **Redux** for global state management and React Router for navigation.
- Conducted code reviews and onboarded teammates on Linux CLI fundamentals.

PROJECTS

CDLC.CLUB — Student & Mentor Learning Platform ↗

Stack: *Nuxt 4 · Vue 3 · TypeScript · Supabase (PostgreSQL) · Sanity CMS · Mux · Zoom API · Cloudflare Workers*

- Built **solo, end to end**, an invite-only education SaaS linking school students with industry mentors via courses, live masterclasses, and groups; five-role access enforced with Supabase row-level security.
- Integrated **Zoom webhooks** for masterclass attendance and recordings, Mux lesson video, mentor-reviewed submissions with XP, and bulk CSV invites.

Pets Distribution — B2B Wholesale Ordering Portal ↗

Stack: *Nuxt 4 · Vue 3 · TypeScript · Supabase (PostgreSQL) · GraphQL · WooCommerce · Cloudflare Workers*

- Built **solo** a bilingual (BG/EN) wholesale portal for a pet-supply distributor, pulling the live **WooCommerce catalogue over GraphQL** with wholesale pricing and a cross-device cart.
- Built a **quote-to-order flow**: admins approve business sign-ups and price orders; database triggers push accepted orders to WooCommerce and email invoices.

Firebase (FCM, Admin)

WooCommerce · Zoom API

Puppeteer · Nodemailer

EDUCATION

Master of Computer Applications (MCA)

University of Mysore

Dec 2021 – Sep 2023 · CGPA: 7.1

Mysore, Karnataka

Bachelor of Computer Applications (BCA)

Sharnbasva University

Jul 2018 – Oct 2021 · CGPA: 8.0

Kalaburgi, Karnataka

TOOLS & PLATFORMS

Git | Kafka | Docker | Nginx | Linux | AWS | Firebase | OpenAI GPT-4 | Cloudflare | PM2 | Bitbucket CI/CD | Postman | Google Cloud

Winasa — E-Commerce & Social Commerce Platform ↗

Stack: *Next.js · Express.js · TypeORM · PostgreSQL · AWS S3 · Firebase · Socket.IO*

- Engineered a **7-service microservices platform** (auth, products, payments, delivery, notifications, CMS, frontend) with TypeScript/Express and PostgreSQL migrations.
- Built the **Next.js admin and vendor dashboard** with role-based access, real-time Socket.IO updates, and Chart.js analytics.
- Integrated a **GCC payment gateway** for multi-currency transactions, Firebase push notifications, and real-time Socket.IO updates.

Sona — Multi-Vendor Marketplace ↗

Stack: *Next.js · React · Express.js · TypeORM · PostgreSQL · AWS S3 · Socket.IO*

- Architected **5 independent microservices** with PostgreSQL, TypeORM migrations, and Docker containerisation.
- Built **three role-based dashboards** (Seller, Admin, Customer) with JWT + Google OAuth and granular RBAC at the API level.
- Integrated a **UAE payment gateway** with webhook handling and AWS S3 presigned URL media storage.

EDC — Emirates Driving Company Website

Stack: *Next.js · TypeScript · Strapi CMS · MySQL · Framer Motion*

- Built a **production web platform** with 25+ server-rendered pages using Next.js App Router, server components, and server actions.
- Delivered **full multilingual support** (Arabic + English) via Strapi i18n and per-locale Next.js routing.
- Secured the platform with rate limiting, SVG XSS validation middleware, and token blacklisting.

Al-Noor Admin Dashboard

Stack: *React · TypeScript · Redux Toolkit + Saga · HeroUI · Tailwind CSS · react-intl*

- Built a **comprehensive education SPA** managing IEP workflows, TDA/SCIP processes, attendance, student records, and goal tracking.
- Implemented **Redux Toolkit + Redux Saga** across 10+ feature slices for complex async state and API orchestration.
- Designed an **RBAC system** (HOD, Students-Affairs-Secretary) with route guards and permission-gated components.

Tmkeen — AI-Powered Expense Management

Stack: *Express.js · Kafka · React · MySQL · OpenAI GPT-4 · Microservices*

- Built an AI finance app using **OpenAI GPT-4** for spending analysis, personalised saving tips, and automated PDF profit/loss reports.
- Led all backend operations: authentication, financial calculations, budget-vs-actual tracking, and Kafka event streaming.

Recook — AI Recipe Generator

Stack: *Express.js · Kafka · React · MySQL · Puppeteer · OpenAI GPT-4 · Microservices*

- Built a recipe extraction pipeline using **Puppeteer scraping + GPT-4** to parse YouTube/web URLs into structured recipes with nutritional data.

Dubai Young Professionals ↗

Stack: *Express.js · Kafka · MySQL · Microservices*

- Built auth, mutual connections, event management, and invoice generation for a **professional networking platform** serving the UAE market.
- Developed **Kafka consumer/producer webhooks** for transactional email delivery; managed dev/prod deployments.

E-Learning Platform & Draft Portal ↗

Stack: *Vue.js · Pinia · Strapi CMS · MySQL · Express.js · MongoDB*

- Led backend of a trade finance education platform using Strapi CMS for user records and media management.
- Built a document generation system producing **SBLC, BG, DLC financial drafts** in DOCX and PDF for banking professionals.
